JJR-CALIPERS & DISC

RACE

Oversize brake calipers and disc

FATIGUE

High performance brake pad

BRAKE POWER

Brake setup perform in the competition

FADING

Temperature management improved to resist the hardest conditions

FEELING

New twin brake balance master cylinder performed to arise the best feeling and brake response without fatigue.

WEAR

Disc upsized thanks the new generation calipers, allowed to reduce disc and pad wear keeping its highest brake power.

BRAKE ADJUSTMENT

New brake balance adjustment integrated in the master cylinder adjustable easily from the dashboard. This adjustment allows to modify the brake balance between front and rear axle in $\pm 40\%$

	FRONT	REAR
Mounting centres	130mm	130mm
Piston $\varnothing$	40x2 / 36x2	27x4
Pad	Sintered 34,5cm2	Sintered 34,5cm2
Port	M10x1	M10x1
Disc – max $\varnothing$	282mm	268 mm
Disc – Thick max	7.5mm	7.5mm
Weight	2036gr	1918gr

WHAT DOES INCLUDE?

JL J. JUAN

PLUG & PLAY RACING BRAKE KIT

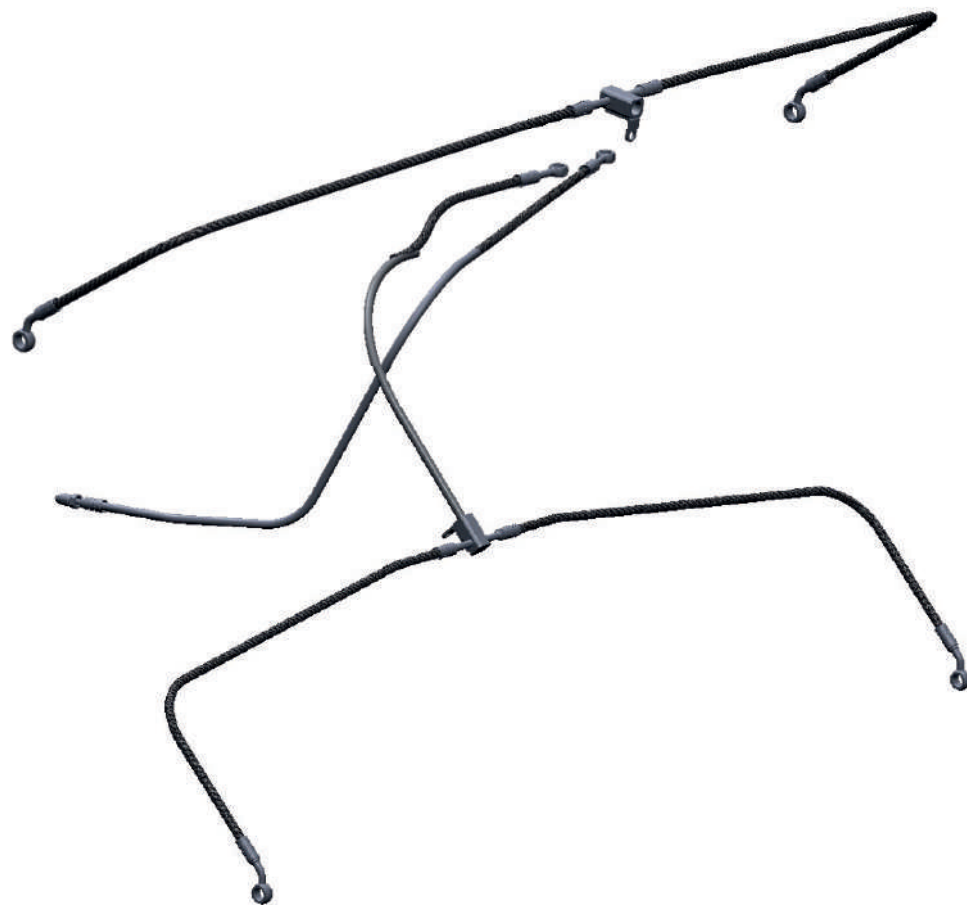

- 2 front racing CNC calipers
- 2 rear race racing CNC calipers
- Race-drilled assembly bolts & washers
- 4 oversized stainless steel discs
- 4 sets of side-by-side sintered pad
- Assembly and service manual
- JJUAN stickers

JJR-K70003M00

JJR-BRAKE HOSE KIT

Oversize brake calipers and disc

New BLUE SEREIS RACE Brake Hose, with efficiency improvement. High performance brake hose with stiffness RACE performance

High stiffness to arise high pressure to get the maximum brake power.

Temperature management improved to resist the hardest conditions.

WEAR

Stiffness brake hose customized. New twin brake balance master cylinder performed to arise the best feeling and brake response without fatigue.

Disc upsized thanks the new generation calipers, allowed to reduce disc and pad wear keeping its highest brake power.

BRAKE ADJUSTMENT

New brake balance adjustment integrated in the master cylinder adjustable easily from the dashboard. This adjustment allows to modify the brake balance between front and rear axle in $\pm 40\%$

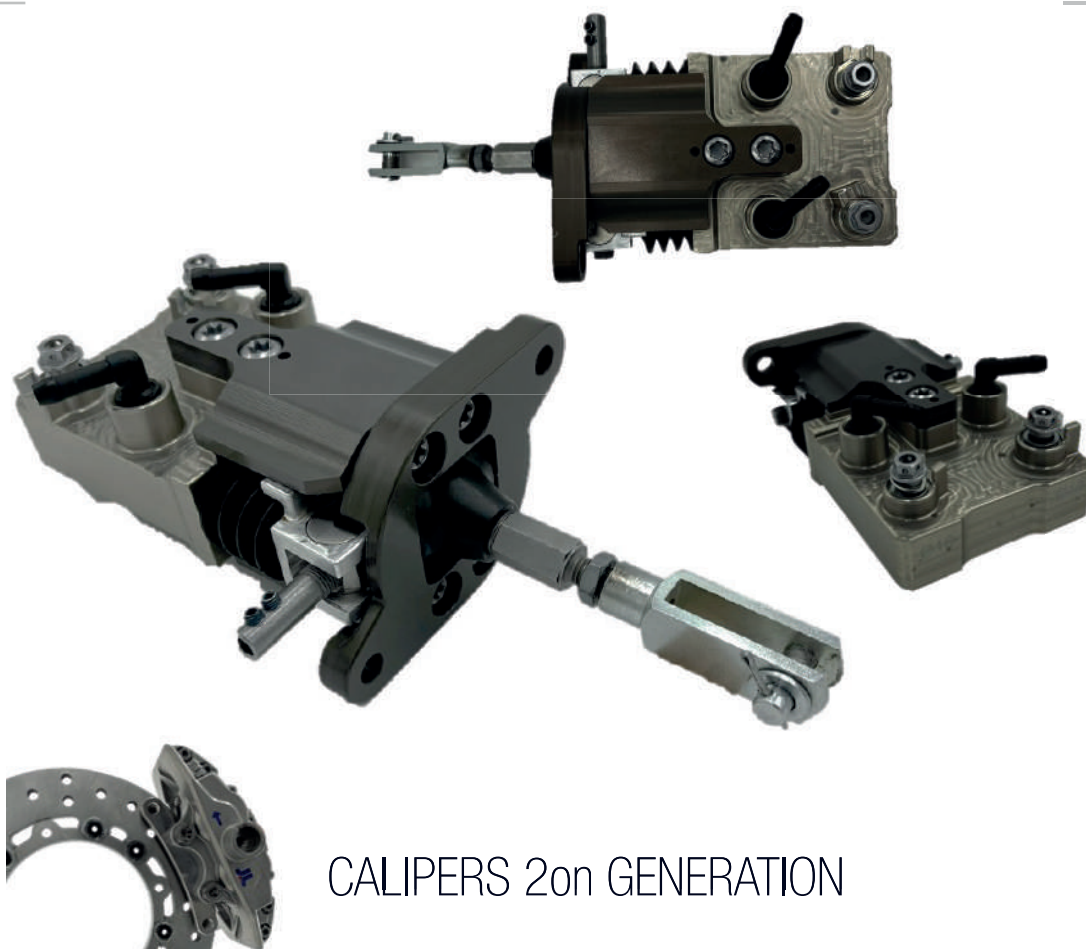

ADVANTAGES

New BLUE LINE racing performance
High stiffness features to improve the feeling
Stainless steel RACE fittings
Banjo bolt with sealing holes system.

Can-am | Maverick X3

MASTER CYLINDER TWIN BRAKE BALANCE - MTBB
JJR-K62007M00

CALIPERS 2on GENERATION

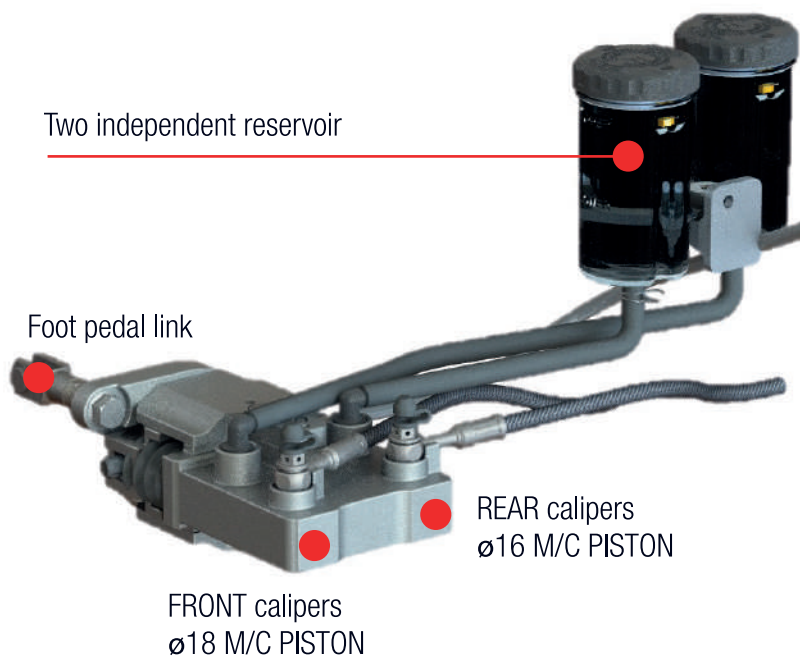

Long life seals port les system to keep its perform below the worst contidions.

Temperature management improved to resist the hardest conditions.

Disc upsized thanks the new generation calipers, allowed to reduce disc and pad wear keeping its highest brake power.

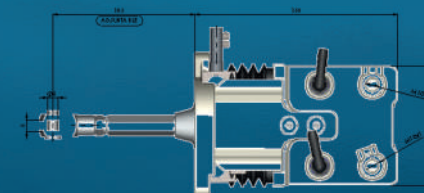

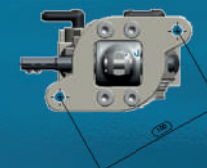

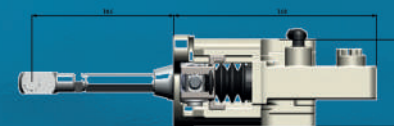

Can-am | Maverick X3

MASTER CYLINDER TWIN BRAKE BALANCE
MTBB JJR-K62007M00

ADVANTAGES

- Plug & play system
- Not requires any modification to install in vehicle
- Compatible with JJUAN SSV caliper New generation
- M/C balance system allows to performance a fine tune adjustment $\pm 40\%$ Front Vs Rear Brake.
- Remote adjustment easy installation on board.
- Include remote cable reinforced without hiteresis
- Allow to two apply different M/C diameters to arise the best performance setup, according with the calipers applied on vehicle. Contact with Tech service to suggest the best setup.
- Piston center valve system
- Minimum idle stroke in food pedal
- Long life pistón seals
